

## **Business opportunities in Greater Bay Area (GBA) , China**

Eleven cities in Guangdong Province with a total population of 80 million aims to become the most vibrant and world-class city cluster with highest GDP per capita in next 10 years.

1. Attract world talents and entrepreneurs with most liberalized market for all business sectors and foster globally competitive business environment.
2. Become an international innovation and technology hub with international influence
3. Facilitate free flow of capital, human resources, goods and information among cities in GBA and cities are well organized to position to achieve the goals of 14th and 15th Five Years Plan.
4. Excellent infrastructure such as highways, bridges, Express trains make one hour travel among cities in GBA close at hand and intensive telecommunication framework allows efficient information interflow and data sharing among the “Smart cities” in GBA.

The GBA cities are accessible for foreign companies in most of the business sectors.

Import taxes on goods will be greatly reduced in China GBA cities. More supportive policies and incentives for talents and innovative entrepreneurs, especially in High-Tech sectors are in place and coming. Government institutions, universities, research institutions, industrial pioneers together with talents and innovative entrepreneurs form the dream team (representing complete cycle of chain of activities, processes and products) for innovations, which in turn will leverage the efficient financial markets to reflect the commercial value of the innovations in China Market, the RCEP markets and the world market. The China story of Tesla will be very common in coming years.
